

# *My Own Earth!*

Name: Joe

## Information

The earth has warmed by about 1°F over the past 100 years. You might ask “why?” The answer is still unclear and scientists are not sure. The earth could be getting warmer on its own, but many of the world's leading climate scientists think that things people do are helping the Earth get warmer. You might be thinking: “Why is this important?” This is important because if we don't do something about this we all might have to leave our homes and maybe even the planet because our earth could get to
